October 31, 2006

Council on Academic Affairs
W. Randy Smith, Vice Provost
Office of Academic Affairs
203 Bricker Hall, 190 N. Oval Mall

Dear members of the Council on Academic Affairs:

In April, the International Studies Program proposed that students majoring in International Studies be allowed to double major within the program by selecting one area of study and one thematic focus. This will allow students to gain a more rounded education as was the intention of the founders of the program in 1943. Students will be able to double major in International Studies and minor in a foreign language for 196 credit hours.

The proposal was presented to Subcommittee A of the Arts and Sciences Committee on Curriculum and Instruction, and was approved. The proposal was then presented at the October 27, 2006 ASC CCI meeting; the CCI recommended that the proposal move forward with its support. We respectfully recommend that the Council on Academic Affairs approve this proposal.

For more information on this proposal, you can view the record on our website: http://artsandsciences.osu.edu/currofc/tracking.cfm?TrackingID=447

The contact person for this proposal is Anthony Mughan, Director of International Studies. He can be reached at mughan.1@osu.edu.

Please let me know if you have any questions.

Sincerely,

Jessica Mercerhill
Director

CC: Tony Mughan

Attachment: Proposal for Double Major in International Studies
Dear Ed,

Please find enclosed with this letter a formal proposal to allow students to double major (or major and minor) in International Studies. We have briefly discussed this proposal previously and I have followed your advice in putting it together. The body of the text is a justification for the proposal, with special attention being paid to the academic and vocational benefits of a combined area studies and thematic focus, to the existence of other double majors within single teaching units, and to the intentions of the founders of the International Studies program at Ohio State. Care has also been taken to minimize the time commitment that students will have to make and the trade-off achieved seems to be reasonable. For 196 credit hours, students will be able to graduate with a double major in International Studies and a minor in a foreign language. Appended to the proposal are four model curricula, one for each of the thematic tracks. The curricula demonstrate how the double major and foreign language minor can be gained in this number of credit hours.

I hope the enclosed document fulfills the information needs of both CCI and CAA. If it does not, please get back to me and I’ll provide whatever else you need. Thanks for your help with this.

Best wishes,

Anthony Mughan
Professor, Political Science &
Director, International Studies
Mughan.1@osu.edu
Proposal to Allow Students to Double Major in International Studies
Submitted by
Anthony Mughan, Director
Undergraduate International Studies Program (UISP)
April 17, 2006
1. Rationale

International studies began as the interdisciplinary study of world regions, with its principle focus on the language and culture of the region and with secondary attention to the interaction of the region with the international system. The area studies legacy is evident in the UISP track structure, which includes six areas, or regional specializations: Africa, East Asia, Latin America, Middle East, Eastern Europe and Western Europe. Over time, however, the focus of international education has changed its emphasis to also encompass the study of international problems and trends that transcend world regions. At Ohio State, these "thematic" foci are Development, International Relations & Diplomacy, World Economy & Business and Security & Intelligence. Importantly, the emergence of this thematic focus has not meant simply that the number of major specializations available to students has expanded. Rather, it constitutes recognition that international studies majors now need to bring a set of theoretical tools to specific world regions that allow them to understand better what is going on there. Thus, for example, Africa might still be of interest in and of itself as students focus narrowly on its domestic circumstances. As the world has globalized, however, the impact of international forces on phenomena like the continent's economic performance, its emigration and immigration patterns, its political stability, its arts, literature, and the like has also come to command study. In other words, Africa is better understood if the domestic and international forces shaping the region are combined into a coherent whole. What is the region's history and how is shaped by internal forces, like its history, topography or ethnic diversity, as well as external forces, like international lending institutions and U.S. foreign policy? Equally, theoretically defined phenomena like development and diplomacy are better understood if they are studied intensively in the context of a specific world region like Africa or Western Europe.

It is, of course, impossible, within the confines of an undergraduate major, to study any region of the world in all of its domestic and international complexity. Indeed, judging by the choices of recent IS majors, the preference of students is to major in thematic, rather than regional, specializations. Nonetheless, a good number of them over the years have also expressed a desire to "apply" their thematic expertise to a specific world region in an effort to understand better the origins and impacts of international phenomena of interest to them, like globalization and the spread of terrorism. To have a good understanding of the phenomenon of African under-development, for example, requires a familiarity with, first, economic and
political theory, second, the motives and strategies of First World countries and the international institutions they sponsor, like the World Bank and the World Trade Organization, and, third, the complex economic, social and political history of the continent itself.

2. Proposal

This proposal is intended to meet the demands of students who have this combination of an interest in the more theoretical approach of the thematic tracks AND the more applied approach of the regional tracks. Specifically, my proposal is to allow students to double major (or to major and minor) in International Studies by formally dividing the two sets of tracks and allowing students to select one major from the four thematic specializations (identified above) and the other (or a minor) from the six regional ones (Africa, East Asia, Eastern Europe, Middle East, Latin America and Western Europe). They would not be allowed to double major (or major and minor) within either set of tracks. Also important is that this formal division of the tracks would have no implications at all for single majors or minors. They would continue be able to choose among all ten specializations.

To make the double major (or major and minor) option available to students would improve the major in several ways:

The double major would necessarily include more foreign language. As it stands, each IS track contains a mandatory two courses of foreign language above and beyond the Arts & Sciences requirement of 20 hours. To do two IS tracks would mean that the student completes four courses beyond the Arts & Sciences minimum, or minor in a foreign language. Minimally, the student would be able to lay claim to four classes beyond the 104 GEC. This “extra” language is of value in its own right, but it also enhances the student’s international studies (language and culture) credentials. Graduates would be better-rounded for having the region-specific knowledge normally expected of IS graduates AND a complementary body of theoretical knowledge that would allow them to understand better their region’s place in the world and the world’s impact on their region.

Graduates would be better prepared for graduate education that emphasizes this same combination of theoretical sophistication and area knowledge (including good language skills). Even if they were to go on to professional school, they would have the kind of background that prepares them well for a career in international law, international business, and so on. The combination of theory and regional knowledge will serve students better than either on its own if they decide to enter the labor market immediately upon graduation. The combination of
Security & Intelligence and Middle East tracks, for example, would prepare students well for the many jobs now available in state and federal government security agencies as well as in the private sector.

The academic case for this double major is strong, so is precedent.

3. Precedent

An important point that needs to be made is that it is not at all unprecedented for a single OSU teaching unit to offer a double major. Those that do come from different colleges and are:

<table>
<thead>
<tr>
<th>Department</th>
<th>Double Major</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sociology</td>
<td>Sociology and Criminology</td>
</tr>
<tr>
<td>NELC</td>
<td>Arabic, Hebrew and Islamic Studies</td>
</tr>
<tr>
<td>French &amp; Italian</td>
<td>French and Italian</td>
</tr>
<tr>
<td>Spanish &amp; Portuguese</td>
<td>Spanish and Portuguese</td>
</tr>
<tr>
<td>EALL</td>
<td>Chinese, Japanese and Korean</td>
</tr>
<tr>
<td>Greek &amp; Latin</td>
<td>Classics, Modern Greek</td>
</tr>
<tr>
<td>Communication</td>
<td>Communication and Journalism</td>
</tr>
<tr>
<td>Biological Sciences</td>
<td>Biology and any other major within the College</td>
</tr>
</tbody>
</table>

Just as with these units, this proposal has a solid academic foundation. There should be no suspicion that it represents a self-interested effort on the part of UISP to take advantage of a recently introduced budgetary system that rewards undergraduate enrolments. A number of considerations need to be taken into account here. First, the large majority of the courses that International Studies students take are offered in departments, and not in International Studies. Therefore, the double major should not be a net drain on enrolments in other teaching units. Indeed, the opposite might well transpire. The anticipation is that the double major will encourage additional enrollments and contributing units will benefit from this increase by attracting students they would not otherwise get. Second, this proposal conforms to the spirit of the International Studies major as it was originally conceived at Ohio State (see Appendix A). Then, it was anticipated that students would study a world region (British Commonwealth of Nations, France and the French Colonies, Spain and Portugal, Italy, Germany and Central Europe, Eastern Europe and the USSR, Latin America, and The Orient)

5
and then a “topical grouping” (Diplomacy and International Politics, Foreign Administration 3 International Economic Relations, Foreign Commerce, and Language and Literature).

4. Time to Graduation

Attached is a model curricula for a student who completes two majors; one with a Thematic focus and the second with an Area Studies focus, and a language minor (see Appendix B). In all cases it is possible for this hypothetical student to graduate in 196 hours, which compares favorably to the 191 hours that is the current average for graduates with a single major. Of course, certain assumptions, particularly about a timely choice and professional advising, are built into this model curriculum, but these assumptions are not unreasonable. Certainly, UISP has highly professional and accessible advisors.
APPENDIX A: International Studies Curriculum circa 1943
May 31, 1943

In accordance with a request from President Bevis to Dean Stradley that various efforts toward foreign-service curricula be consolidated, the attached proposals for a curriculum in International Studies have been prepared by the undersigned committee with the active cooperation of Dean Smith and Dean Stradley.

The report is now submitted for consideration by the Administrative Council, the several Colleges, and the Council on Instruction.

In view of present world conditions the committee unanimously recommends that International Studies be legalized to begin with the Autumn Quarter of 1943, in order that qualified juniors and seniors may benefit, at least in part, from the plan for the upper division.

PROPOSED CURRICULUM

IN

INTERNATIONAL STUDIES

(To start in Autumn, 1943, if possible)

I. OBJECTIVES

A. World-mindedness as a central idea or theme for an interdepartmental curriculum or program (1) focused on a single geographic area, (2) including a topical emphasis, (3) planned for both men and women, and (4) designed to promote both good citizenship and a broad culture well motivated and integrated.

B. Training for domestic vocations involving foreign relations: governmental, social, economic, industrial, etc.

C. Training for various types of foreign service; e.g., diplomacy, foreign administration (governmental, social, economic, industrial, military).

D. Supplementary training for professional students planning to practice abroad; e.g., students in Foreign Commerce, Accounting, Law, Engineering, Chemistry, Medicine, Dentistry, Pharmacy, Veterinary Medicine and Surgery, Entomology, Agronomy, Teaching, etc. Students in professional fields are advised to follow their regular curricula but to supplement them by appropriate courses or groups of courses chosen from International Studies to suit individual objectives. Possibility of five-year joint curricula should be investigated.

E. Training of foreign students at this University, especially exchange students.

F. Articulation with graduate study to be planned later.

II. AREAS

The following list of areas is not intended to be final, absolute or mutually exclusive but represents rather an indication of what may be attempted at the outset. Other regions may be subsequently added or the definition of a region may be adapted to suit individual needs.

A. Europe

1. British Commonwealth of Nations
2. France and the French Colonies
3. Spain and Portugal
4. Italy
5. Germany and Central Europe
6. Eastern Europe and the U. S. S. R.
B. Latin America
C. The Orient

III. TOPICAL GROUPINGS
(See Section I, D, above and introductory statement for junior year, infra.)
A. Diplomacy and International Politics
B. Foreign Administration
C. International Economic Relations
D. Foreign Commerce (Students interested should register in the College of Commerce.)
E. Language and Literature (See Section IX, E.)

IV. ADMINISTRATION
A. Scope: interdepartmental and university-wide but with articulation and unification.
B. Director and supervisory committee with these duties:
   2. Continuous study of vocational opportunities for foreign service, with guidance of advisers and students accordingly.
   3. Selection and supervision of advisers for students.
   4. Passing on eligibility of all students emphasizing International Studies.
      a. Majors
      b. Majors in other curricula electing parts of International Studies as "service" courses. (See I, D.)
      c. Transfer students. (See also paragraph C, below.)
C. A carefully chosen group of advisers to guide students through all four years under supervision of director and supervisory committee; advisers and students to have, particularly in upper division, discretion for choice of courses suited to individual aims and needs but harmonious with general policies governing International Studies.
D. A staff of specialists combining sound scholarship with broad interests and exceptional teaching ability, and preferably having first-hand acquaintance with region or area to which assigned.

E. Supplementary instruction by occasional lecturers and by consultants, including nationals present on the campus and faculty members with previous foreign residence -- from any department or college of the University.

F. Further supplementation of formal instruction with "tables" for conversation and with meetings of international and interracial groups for discussion, for sociability, for practice in conversation, and for accustoming native Americans to adjusting themselves to persons from other countries; to include foreign students and others in the University community, in churches, in settlement houses, etc.; purpose to enrich student's experience by utilization of his spare time. Student committees or "interest groups" could be organized to present value of the program to other students.

G. Admitting to International Studies only students whom the director and supervisory committee consider qualified; and promoting to the upper division only those whom the director and supervisory committee believe qualified. Note that the lower-division program is broad enough to facilitate transfer to other curricula at the end of the sophomore year.

H. Use of proficiency tests for Em credit to raise number of electives and to increase flexibility of curriculum.

I. Stressing that choice of foreign language in lower division will largely predetermine the regional emphasis in upper division.

J. If practicable, classification of students in International Studies together in a single (preferably not a separate or exclusive) section of at least one course each quarter, to enable them to participate in group thinking about their programs.

V. PRINCIPLES AND POLICIES

A. Fusing the cultural with the vocational and vice versa; avoidance of overemphasis upon supposed differences or mutual exclusiveness.

B. To render curriculum both progressive and cumulative, yet flexible, the arrangement of courses from general to particular, from fundamentals to specialized applications; the adviser to have authority to change order of courses to make room for appropriate electives.
C. Unification and integration of curriculum by—

1. Cores running through the first two years (a) to articulate all current courses; (b) to fill in gaps (e.g., as to agriculture, industry, engineering, economics, social conditions, etc., etc., of a given area); (c) to promote esprit de corps by providing students in International Studies opportunity to meet occasionally as a group; and (d) to guide students, culturally and vocationally, toward choice of regional and topical emphasis in upper division or, in case of unsuitable candidates, toward withdrawal from International Studies.

2. Conference course in junior year to serve analogously to cores as indicated in preceding paragraph but on more advanced level and with larger participation by students. Instructor to cooperate actively with the language departments to divide labor and to achieve integration of subject matter.

3. In senior year a regional proseminar conducted by a director with assistance of a panel of specialists, (a) to supply detailed knowledge of the geography, climate, ethnology, social conditions and practices, religion, education, agriculture, economics, industry, political institutions, etc., etc., of the country or region of concentration, and (b) by occasional consolidation with proseminars in other regional areas to encourage interchange of ideas, promote flexibility, and increase breadth of view.

D. Requirements in quarter hours, for graduation:

JUNIOR YEAR

Note: Before the opening of the junior year the student will ordinarily be expected to choose, with the help of his adviser, --

1) A region for a major; e. g., Latin-America, Germany or the Orient. (See also Section IX, E.)

2) Some general or background courses pertinent or appropriate to the major, especially in Political Science, Philosophy, Geography and Fine Arts, from a different region, for supplementation and balance; e. g., courses on a European region or the Orient to supplement a major in Latin-America.

3) Courses selected from one of the topical classifications. (See Section IX.)

A. GENERAL REQUIREMENTS (27 hours for the 3 quarters)

Economics 401, 402, Principles of Economics (5,5) 10
Geography 621 (Europe) or 628 (Latin America) or 625 (Far East) 5
Political Science 613, Contemporary International Politics
Area Studies 601, 602, 603 (core), Conference Course (3,3,3) 27

B. RECOMMENDED ELECTIVES (24 hours for the 3 quarters)

1) General
   Geography 611, Cartography and Map Interpretation 3
   Foreign Language (continuation or second language) 3-15
   History 650, 651, Contemporary Europe (3,3) 6

2) Regional
   See list of recommended regional groups in Section VIII.

3) Topical
   See list of recommended topical groups in Section IX.

1To be used part of each work for conference period for integrating courses of students in International Studies. Must be broad enough and flexible enough to provide some background for Latin America and the Orient as well as for Europe, particularly through outside reading anticipating future regional emphasis.

2Subject matter for composition to be drawn largely from Area Studies 401-2-3.

3For adequate reason and upon approval of director another science sequence may be substituted. A new sequence in Human Biology would be desirable here.

4To be used as coordinate core for area in which the language is spoken.

5This requirement may be partly fulfilled by a satisfactory score on the proficiency test.
SENIOR YEAR

A. GENERAL REQUIREMENTS (9 hours for the 3 quarters)
   Regional Proseminar (new course) to be called
   Area Studies 721, 722, 723, Europe (2,2,2)
   Area Studies 731, 732, 733, Latin America (2,2,2)
   Area Studies 741, 742, 743, The Orient (2,2,2)
   Bacteriology 5--, International Health. 3 hours.

B. RECOMMENDED ELECTIVES (39 hours for the 3 quarters)
   1. General:  Foreign Language (continuation only).
   2. Regional: See list in Section VIII.
   3. Topical:  See list in Section IX.
## VII. RECOMMENDED ELECTIVES: GENERAL

See Europe and Latin America.

1Offered in 1943-44 and alternate years.
APPENDIX B: Sample Double Major
In this appendix four model curricula will be presented. A thematic focus is matched with an area focused on in each example. The Colleges of the Arts and Sciences provide students with "Special Academic Opportunities" to facilitate completion of two majors in a timely fashion. The college rules governing these opportunities are given below.

**Special Academic Opportunities**
(See "Colleges of the Arts and Sciences, Advising and Procedures Handbook, 2005-06", pg. 15.)

In the range of its disciplines and programs Ohio State offers students exceptional opportunities for enrichment – double majors, minors and special programs that can all serve to enhance the quality of the degree you choose to complete.

**Double Majors**

- The two majors must be in different subject matters.
- You must meet the requirements for each major as set by the unit(s) offering the majors.
- Each major must contain at least 30 hours not contained in the other.
- Overlap with the GEC is permitted where appropriate (overlap with the GEC is not permitted with a single major, unless specifically allowed by a particular GEC category). If one or more majors are in the humanities or the social sciences, more than one course from the area of the major may, if appropriate, count toward the GEC requirement in the humanities or social sciences.

**Key:**

RED: overlap with GEC and major, and GEC and minor.

BLUE: overlap between majors.
BACHELOR OF ARTS, ARTS & SCIENCES—Total Hours: 191

1st Major: DEVELOPMENT STUDIES

2nd Major: LATIN AMERICAN STUDIES

Minor in Spanish

Professor Anthony Mughan
Director, Undergraduate International Studies Program
2048 Derby, 154 N. Oval Mall
CAMPUS

Dear Tony:

I am writing in my capacity as Director of the OSU Foreign Language Center and on behalf of the chairs of the foreign language departments in the College of Humanities. As you know from our meeting with you earlier this year, the foreign language chairs gave their strong support to your proposal to allow student to double major in international studies. We are particularly supportive of the proposal because it allows, indeed encourages, students to combine thematic majors such as Development or Security and Intelligence, for example, with regional specializations. As such, students will gain an in-depth understanding of the social and cultural factors contributing to these broader themes. In addition, we are pleased that UISP will require students who take this double major to take 10 additional hours of language courses per major (for a total of 20 hours beyond 104). The double major in combination with increased language and cultural courses will result in students who are even better equipped to function in professional settings where they need to combine domain expertise with cultural and linguistic competencies.

Please let me know if you need additional information or have questions.

Sincerely,

Diane W. Birkbichler
Director, Foreign Language Center
Professor and Chair, Department of French and Italian
Tony,

The area studies centers met today to review the double major proposal, including a detailed examination of the appendices. We strongly support the proposal, for all the reasons that you and I have discussed.

Best regards.

Jerry

Jerry R. Ladman
Associate Provost for International Affairs
