Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

Program Learning Goals

* Students will gain substantive knowledge of rural sociological theory, social problems, processes of development & globalization, diversity and complexity of rural life, and challenges faced by people and institutions in small towns and rural areas.
* Students will gain greater inter-disciplinarity in their graduate program studies.
* Students will have a solid foundation for future research, teaching, policy making or other employment in nonmetropolitan settings.

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans
If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Re: School of Environment and Natural Resources Semester Program Proposal

The faculty and staff of the School of Environment and Natural Resources (SENR) have completed a thorough review and revision of our undergraduate and graduate curricula in preparation for the conversion to semesters, and the SENR faculty has voted to recommend that the Office of Academic Affairs approve the attached semester curriculum proposals. In addition to the work of several curricular sub-committees within the School, the SENR Academic Affairs Committee reviewed and approved all semester conversion plans for undergraduate programs, and the SENR Graduate Studies Committee reviewed and approved plans for the MS, PhD, and MENR graduate programs. SENR faculty approved these semester plans by unanimous vote (25 in favor, 0 opposed, 0 abstentions) on April 16, 2010; subsequent minor revisions and updates to the plans have been approved by SENR curriculum committees as appropriate.

The following outline details the SENR programs proposed for semester: A) conversion, B) new approval, C) deactivation, and D) termination.

A. Existing SENR programs to be converted to semesters include:
(Note: Rural Sociology programs included below became part of SENR in 2010; program degree codes are in parentheses following program titles; specialization three-letter codes are in parentheses following specializations.)

Four Undergraduate Majors:
1) Environmental Science (ENVSCI-BS): modified from four to five specializations representing existing focal areas in the major, including Ecosystem Restoration (ECR), Water Science (WTR), Environmental Molecular Science (EMS), Soil Resources and Environmental Sustainability (SOI), and Environmental Science Education (ESE).
2) Forestry, Fisheries, and Wildlife (FFW-BS): converted as semester equivalent, with appropriate revisions to maintain certification and double-certification options uniquely available (compared with other programs nationally) to students in this major, including Society of American Foresters (SAF) accreditation and The Wildlife Society (TWS) and American Fisheries Society (AFS) certifications. Three-letter specialization codes for FFW specializations (FAS, FOR, FWM, UFW, WFS, WPV, WLS) are detailed in the comment field of the FFW-BS program request.
3) Environmental Policy and Decision Making (ENVPDM-BS): modified in title (previously Environmental Policy and Management (EPM)) and designating three specializations based on existing focal areas in the major: Climate Change (CCP), International Issues (IIP), and Water Conservation (WCP).
4) Natural Resource Management (NATRESM-BS): modified in title (previously Parks, Recreation & Tourism (PRT)) and designating three specializations based on existing and emerging focal areas (made possible by the addition of Rural Sociology faculty to SENR in 2010) in the major: Parks and Recreation Management (PRM), Natural Resource Administration and Management (NRA), and Sustainable Agriculture (SAG), with additional focus-area options (non-transcript) aligned with employment opportunities and existing programs in the School: Forestry, Fisheries, Wildlife, Soil and Water, Visitor Services, and Zoo Science and Management.

Two Undergraduate Minors:
1) Soil Resources (SOILSCI-MN): converted as semester equivalent.
2) Rural Sociology (RURLSOC-MN): converted as semester equivalent.
Two Graduate Degree Programs:

1) Master of Science (ENVNATR-MS): converted as semester equivalent
2) Doctor of Philosophy (ENVNATR-PH): converted as semester equivalent

The Environment and Natural Resources Graduate Program awards both MS and PhD degrees in seven areas of specialty (all converted as semester equivalents):
- Ecological Restoration (ERS)
- Ecosystem Science (ECS)
- Environmental Social Sciences (ESS)
- Rural Sociology (RS)
- Fisheries and Wildlife Science (FWS)
- Forest Science (FS)
- Soil Science (SSC)

Three Graduate Minors (all converted as semester equivalents):
1) Environment and Natural Resources (ENVNATR-GM)
2) Soil Science (SOILSCI-GM)
3) Rural Sociology (RURLSOC-GM)

One Professional Degree Program (converted as semester equivalent):
1) Master of Environment and Natural Resources (ENVNAT-MEN)

Three Combined Programs (all combined programs will be converted as semester equivalents, and impose no additional requirements or provisions beyond the requirements of the combined degrees. As such, and abiding all college and university rules of the degree-granting partners, forms for these combined degrees are not included in these SENR semester electronic program proposals):
1) Combined BS/MS
2) Combined BS/MENR
3) Dual Degree Program with the John Glenn School of Public Affairs: MS/MAPP (Master of Arts in Public Policy and Management) or MS/MPA (Master of Public Administration)

B. New SENR semester programs proposed for approval by OAA:
Four undergraduate minors have been developed for semesters. Three minors correspond with existing majors in the School; these three minors collectively replace the Natural Resources Management minor. The fourth minor, Sustainable Agriculture, has been developed through the collaboration of Rural Sociology and Soils faculty, together with colleagues from across the College of Food, Agricultural and Environmental Sciences.

Undergraduate Minors:
1) Environmental Science (ENVSCI-MN)
2) Forestry, Fisheries & Wildlife (FFW-MN)
3) Society and Environmental Issues (SOCENV-MN)
4) Sustainable Agriculture (SUSTAGR-MN)

C. SENR programs to be deactivated:
Each listed below is an old program name that has been replaced by current programs listed above, either through revised titles (1-3), or being subsumed as a specialization into the ENR MS and PhD (4-9). With the exception of Rural Sociology, which joined SENR in 2010, each of these changes were effected three or more years ago.

1) Fisheries and Wildlife Management (FWMGT-BS)
2) Forestry and Urban Forestry (FORUF-BS)
3) Human Dimensions in Natural Resources (HDNR-BS)
4) Natural Resources (NATRES-PH)
5) Natural Resources (NATRES-MS)
6) Rural Sociology (RURLSOC-MS)
7) Rural Sociology (RURLSOC-PH)
8) Soil Science (SOILSCI-PH)
9) Soil Science (SOILSCI-MS)

D. SENR programs to be terminated:
1) Natural Resources Management Minor (NATREM-MN): this minor is being terminated because of its broad scope and is being replaced by the more specific new minors listed above that correspond to existing majors.

SENRE faculty and staff have worked tirelessly to develop these plans, engaging in a thorough and collegial process. Two faculty retreats devoted significant time to semester conversion plans, and all faculty meetings beginning in the fall of 2009 included updates and discussion about semester conversion planning. Dr. Greg Hitzhusen was appointed by the School as a point person to facilitate Q2S planning, participated in regular UCAT Q2S workshops with colleagues from across the university, and established a Carmen site to share and organize Q2S working documents and resources. In addition to the committees mentioned above, several new committees led the curriculum development process, including four faculty working groups formed within each of the majors, and a core curriculum committee of a dozen faculty representing all of the specializations across the four undergraduate majors and including myself and the chairs of the Grad Studies Committee and Academic Affairs Committee. These groups reviewed all recent SENR curriculum revisions, researched semester programs of peer institutions, and generated creative proposals of how to improve and better integrate our multi-disciplinary curriculum. Curriculum mapping revealed gaps and overlap in our curriculum; to match our semester courses to our learning goals, at least nine new courses have been proposed, several others have been merged, and at least 75 courses will be discontinued. As a previous director of a Natural Resources program that underwent semester conversion at the University of Georgia, I provided guidance to revise SENR’s curricular offerings around our core strengths, guided by learning outcome goals and encouraging options beyond existing structures and traditions. Several SENR faculty and staff participated in the College of Food, Agricultural, and Environmental Sciences bi-weekly Q2S Implementation Committee meetings starting in November 2009, sharing planning ideas with Q2S point people from across the College.

We also based our semester curriculum development on several faculty-led research efforts. Our social science faculty created a survey of environmental curriculum interests and career goals for CFAES, SENR and OSU undergraduate student samples, and results from over 1300 respondents (published results now in press) informed our vision of student interests, needs, and knowledge about the environmental topics addressed in SENR programs. We also completed phone interviews with SENR alumni and stakeholders to examine curricular elements most valuable to graduates and employers. And I conducted exit interviews of SENR students to better understand their experience in SENR programs. These measures and the efforts mentioned above collectively led the faculty to propose an expanded core of courses to help SENR students better integrate natural and social science elements of the curriculum, and to modify the majors as described above. The core curriculum committee will remain intact to monitor the quality and success of the semester curriculum, and make revisions as appropriate into the future.

This proposed curriculum represents welcome changes that increase the efficiency and complementarity of SENR programs, maximizing the expertise of our faculty and improving opportunities for SENR students to prepare for graduate education and succeed in their professional careers. I have also attached a commentary detailing SENR’s preliminary assessment plans for semester programs. These program proposals reflect the outstanding collaborative efforts of SENR faculty to prepare for the semester transition. I heartily recommend approval of these plans, and appreciate OAA’s ongoing efforts to strengthen our curriculum in OSU’s transition to semesters.

Ronald L. Hendrick, Ph.D.
Director, SENR
SENR Q2S Transition Plans

SENR's transition plans, including the OSU Pledge to Students, are posted on the SENR website at:

http://senr.osu.edu/Current_Students/SENR_Quarter_to_Semester_Conversion.htm#

The links listed there are printed below.

Additional transition resources will be posted at this link shortly, including sample four-year plans for students who will graduate with three years in quarters and one year in semesters (3-1), two years in each (2-2), and one year in quarters and three in semesters (1-3). Sample 2-1, 2-2, and 1-3 plans will be posted for each SENR undergraduate major.
SENR and the Quarter-to-Semester Conversion

Why is this happening?

The conversion is the result of a directive from the Ohio Board of Regents and affects twenty 2 and 4 year Ohio colleges and universities that are currently on the quarter system, including: Ohio University, University of Cincinnati, Wright State University, Columbus State Community College, Sinclair Community College, Otterbein College, Clark State Community College, and others. The reasons are many but the main benefits to students are:

- The chance to be more competitive for internships and permanent positions because of an earlier end to the academic year.
- Greater ease of transfer between institutions and academic exchange programs, with an academic calendar consistent with the majority of colleges and universities in Ohio, the United States, and around the world.

When will the semester system be implemented?
The new semester system will become effective Summer 2012. All of OSU will convert at the same time.

Quarter-to-Semester Update

SENR Quarter to Semester Conversion

Preparing the SENR Curriculum for the Semester Conversion

Over the past year, SENR faculty and staff in consultation with students, alumni, and stakeholders have been developing courses and majors that will be implemented at the time of the conversion. The SENR semester majors and courses have been proposed and are now starting the review and approval process. This starts with review and approval by the SENR Academic Affairs Committee and the SENR Faculty. The College of Food, Agricultural and Environmental Sciences will conduct an administrative and fiscal review as well. Eventually, the University’s Council on Academic Affairs (CAA) will review the curriculum and courses being established or revised by the School of Environment and Natural Resources. Ultimately, the OSU Board of Trustee will review and give its approval.

The SENR majors being proposed under the new Semester system are:

1. Environmental Science (ES)
2. Environmental Policy and Decision Making (EPDM)
3. Forestry, Fisheries and Wildlife (FFW)
4. Parks, Recreation and Resource Management (PRRM)

All SENR majors will take a common core of major courses which will be slightly expanded under the new semester curriculum. Most of the SENR majors will remain relatively intact with a variety of enhancements to program options and courses being offered by the School.

How will the SENR Courses be Converted?

All current SENR courses will “disappear” from the course catalog and master schedule starting Summer 2012. In their place will be the semester courses. Several courses it will be a “straight” conversion with just a change in course number and credits and possibly title. These courses will appear as direct transfer in the degree audit.

In other cases, courses have been changed significantly because of being combined with other courses. How these courses transition into filling major requirements will vary, depending on what a student has taken. Some semester courses will be completely new. In most cases these
won't fill an old requirement but, under special circumstances, may be used to satisfy a particular curriculum requirement where a requirement gap may exist. This will be determined by the student's faculty advisor, the SENR Secretary, and the SENR Academic Affairs Committee.
SENRE Quarter to Semester Conversion

Semester Planning: What Can Current Students Do Now?

If you are going to be here for the quarter to semester switch (Summer 2012) you are a transition student, here's what you should be doing now:

1. Get those science and math GEC's done before the conversion if you've been putting them off. The courses will be longer with more material covered under semesters. That goes for any other course you've been dreading.
2. You can start preparing yourself mentally for taking FIVE 3 hour courses a semester instead of THREE 5 hour classes. A common mistake for students moving from quarters to semesters is to not take enough classes. You'll need a minimum of 121 hours to graduate under semesters, so if all courses were done under semesters that's 121 \div 8 = 15.1 \text{ hrs/semester}.
3. You will most likely have classes all 5 days a week. It will be harder to schedule those Mondays and Fridays off.
4. About half of your courses will meet only on M, W, F and the other half of your courses only on Tu and Th so if you miss a M and/or W, you'll miss 1/3 to 2/3 of those M,W, F courses.
School Of Environmental & Natural Resources
http://senr.osu.edu/secondaryprint.asp?id=1c=SENR_Quarter_to_Semester_Conversion&info=&pageld=Q2S_and_Earned_Credits

QSU
Quarter-to-Semester Update

SENР Quarter to Semester Conversion

How will earned course credits be handled?

For transition students (those who start under quarters and finish under semesters), the credit hours for quarter courses will be converted to semester credits at the conversion rate of 0.6667.

For example, a 5 hr quarter course will be converted to $5 \times 0.6667 = 3.3$, 4 qtr. credits will convert to 2.6, and 3 credits become 2 under semesters.

Required Hours for Graduation:

For most majors, a minimum of 121 semester hours (to fill the required categories) will be required for graduation. (For most current SENR majors the minimum amount is 181 quarter hours to fill the required categories). Transition students will graduate when they have the required number of semester hours and those hours fill required categories.

Quarter-to-Semester Update

SENR Quarter to Semester Conversion

Q2S Course Numbering

All semester courses will be 4 digits, to distinguish them from quarter courses.

1000-1099  UG (undergrad) – Non Credit Courses for orientation, remedial, or other non-college level experiences (like math 040 and 075 currently).

1100-1199  UG – Basic courses providing undergraduate credit, but not to be counted toward a major or field of specialization in any department. Courses at this level are beginning courses, required or elective courses that may be prerequisite to other courses.

2000-2099  UG – Intermediate courses providing undergraduate credit and may be counted toward major or field of specialization.

3000-3099  UG – Upper level courses providing undergraduate credit that may be counted toward major or field of specialization.

4000-4099  UG – Advanced courses providing undergraduate credit that may be counted toward major or field of specialization. Graduate students may receive graduate credit outside their own graduate program.

5000-5099  UG and Graduate (G) courses providing undergraduate credit that may be counted toward major or field of specialization and foundation graduate credit.

6000-6099  G – Foundational level graduate courses and research

7000-7099  G – Foundational level graduate courses and research

8000-8099  G – Advanced level graduate courses and research

Quarter-to-Semester Update

SENRE Quarter to Semester Conversion

OSU Pledge to Undergraduate Students

In planning and implementing its conversion from quarters to semesters for summer 2012, The Ohio State University is committed to protecting the academic progress of students. Students should find that the shift from quarters to semesters does not disrupt progress toward their degrees if they:

1. decide on their major and degree within a time compatible with four-year graduation;
2. meet the standards for progress defined by their academic unit and continue to complete appropriate course loads successfully; and
3. actively develop and follow academic plans in consultation with their academic advisors.

Students completing a quarter-plus-semester degree program will receive approximately the same amount of instruction, and the changes to the calendar and to courses should only improve the quality of programs. Full-time tuition (general and instructional fees) for an academic year under semesters will not cost more than what tuition would have cost for that same year under quarters, and the change should not adversely affect students' financial aid.

To ensure that the conversion will not harm students' progress, academic units will continue to provide intentional, purposeful advising. Academic advisors will understand how the changes in courses and curricula may affect students' degree programs, will know where and how programs can be flexible, and will be prepared to assist students in planning their remaining semesters to graduation. Good planning around a student's major will be particularly important, and the university will provide that support to students who begin their academic career under quarters and complete it under semesters.

Students will vary considerably in their academic progress, and each student's plan for completing degree requirements will need to be determined individually. Every student will be responsible for getting and using the advice essential to assure progress toward his or her degree. Advising is a joint endeavor, and we are confident that students and their advisors, working together, can develop effective plans leading to timely graduation as the university converts to semesters.

Graduate Minor in Rural Sociology

Quarter Version

Purpose: Rural Sociology classes teach about rural poverty, agriculture and food systems, environment and natural resources, public policy analysis, domestic rural development, diffusion of innovations, international development theories and policies, activism and social change, immigration and rural conflict, rural women's lives, and the Amish. A Graduate Minor in Rural Sociology will benefit graduate students from other departments who wish to improve their substantive knowledge of rural sociological theory, rural social problems, processes of development and globalization, the diversity and complexity of rural life, and challenges faced by people and institutions in small towns and rural areas in the U.S. and abroad. The Graduate Minor will introduce greater inter-disciplinarity to students' programs and will help them prepare for research, teaching, policy making or other employment in nonmetropolitan settings and developing countries.

Students must complete 20 quarter credit hours and a minimum of 4 courses in Rural Sociology.

Graduate Minor specialization (track) (student selects one):
   Agriculture and Natural Resources
   Rural Community Development
   Development and Social Change

Plan of study
RS 742 Concepts & Theories 5 cr. (required)

Select one 5-credit course from the following selection of core courses:

For specialization in Agriculture and Natural Resources:
RS 733 Agriculture and Food Systems or RS 766 Environmental Sociology

For specialization in Rural Community Development:
RS 888 Social Action in Community Development

For specialization in Development and Social Change:
RS 892 Rural Sociology of Development and Social Change

Select two 5-credit courses from the following options:
RS 622 Amish Society
RS 662N Diffusion of Innovations
RS 666 Rural Poverty
RS 678 Women in Rural Society
RS 733 Sociology of Agriculture and Food Systems
RS 766 Environmental Sociology
RS 788 Sociological Theory Applied to Domestic Development
RS 888 Social Action in Community Development
RS 892 Rural Sociology of Development and Social Change

STUDENTS WILL GET CREDIT ONLY FOR COURSES WITH A MINIMUM GRADE OF B
Graduate Minor in Rural Sociology

Semester Version

Purpose: Rural Sociology classes teach about rural poverty, agriculture and food systems, environment and natural resources, public policy analysis, domestic rural development, diffusion of innovations, international development theories and policies, activism and social change, immigration and rural conflict, rural women’s lives, and the Amish. A Graduate Minor in Rural Sociology will benefit graduate students from other departments who wish to improve their substantive knowledge of rural sociological theory, social problems, processes of development and globalization, the diversity and complexity of rural life, and challenges faced by people and institutions in small towns and rural areas in the U.S. and abroad. The Graduate Minor will introduce greater inter-disciplinarity to students’ programs and will help them prepare for research, teaching, policy making or other employment in nonmetropolitan settings and developing countries.

Learning goals:
1) Students will gain substantive knowledge of rural sociological theory, social problems, processes of development and globalization, the diversity and complexity of rural life, and challenges faced by people and institutions in small towns and rural areas in the U.S. and abroad.

2) Students will gain greater inter-disciplinarity in their graduate program studies.

3) Students will have a solid foundation for future research, teaching, policy making or other employment in nonmetropolitan settings.

Students must complete 12 semester hours and a minimum of 3 courses in Rural Sociology.

Plan of study
RS 742/ENR/RS 7600: Concepts & Theories 3 cr. (required)

Select one course from the following selection of core 3-credit courses:
