5/20/2016

The curriculum committee for the School of Health and Rehabilitation Sciences recently approved the following changes to the Integrative Approaches to Health and Wellness minor:
- Decrease in required credit hours to 12
- Addition of a course to meet the Mind Body Interventions domain

The primary reason for initiating the changes was an update to the University’s minor requirements in the fall of 2015.

Sincerely,

Sarah Varekojis

The Integrative Approaches to Health and Wellness Minor is designed to study the nature, meaning, and possibilities of integrating Complementary and Alternative Medicine (CAM) into traditional western approaches to health care. An undergraduate who obtains the minor in Integrative Approaches to Health and Wellness will have an increased ability to navigate in the health care, wellness, or corporate arenas which are increasingly considering preventative, proactive approaches to health. These undergraduates will have delved into various paradigms of healing, as well as the western biomedical model, gaining a breadth of exposure to various approaches to health.

The Integrative Health and Wellness Minor consists of 12 credit hours of course work:

Required Core (6 credit hours)
HRS 2530: The Evolving Art and Science of Medicine U3 (a GE under Culture and Ideas) and HRS 4570: The Role of Integrative Medicine in Society U3
