Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

Program Learning Goals

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Elliot Slotnick, Professor and Associate Dean
The Graduate School
University Hall

Dear Elliot,

The Department of Greek and Latin has completed its proposal for a semester version of its GIS in Ancient Mediterranean Religions. The Arts and Humanities Disciplinary Advisory Panel within the College of Arts and Sciences reviewed and approved all programs from the Department of Greek and Latin during its meetings in January 2011. The GIS is converting with minimal change.

The Graduate Interdisciplinary Specialization in Ancient Mediterranean Religions is changing with minimal conversion, and is transitioning from 14 quarter credit hours to a total of 12 credits under semesters with the same pre-requisite requirement. Ten credit hours are required outside the student’s home unit, and are spread across at least 3 courses. Students take one mandatory course, either Classics 5401 or CS 5970 in addition to a minimum of three courses at the 6000-, 7000-, or 8000-level that address ancient Mediterranean religions. The unit has provided a list of current quarter courses and proposed semester numbers that will count on the program along with concurrence letters from the supporting and participating units.

The courses that are specific to all of the programs are listed under multiple Book 3 listings in PACER and have been advanced along with the program forms. All programs from the Department of Greek and Latin have the approval of Arts and Humanities. If you have any questions or concerns, please do not hesitate to call or email me at 292-5727 or williams.1415@osu.edu.

Thank you for your consideration of these proposals,

RE: GIS Religions of the Ancient Mediterranean

Dear Dean Osmer,

I submit the semester version of the Graduate Interdisciplinary Specialization in Religions of the Ancient Mediterranean (GISRAM) to your approval. The Program draws on the resources of the following Graduate Programs whose chairs have written letters of concurrence that I attach:
- Comparative Study
- Greek & Latin
- History (Ancient History)
- History of Art (Ancient Art)
- Near Eastern Languages and Cultures.

Rationale:
In itself, the study of religion is interdisciplinary; in its most elementary form, it combines the study of a single culture and its specific religious forms with the theories and methodologies that the academic field of Religious Studies has developed. Over the past half century, the study of the ancient Mediterranean world has also become increasingly interdisciplinary: its single cultures have, from their inception, been interconnected in complex ways and therefore must be studies through an approach that transcends the framework of a single culture or academic discipline. Graduate students who add this interdisciplinary training to their disciplinary degree are much better equipped to do successful research in these topics and can be expected to succeed better in their profession. GISRAM thus is also a major recruitment tool for the participating departments. The Ohio State University is extremely well positioned to train graduate students in such an approach. Several departments have faculty whose teaching and research is highly relevant to GISRAM. Many of them have already been collaborating informally for some time in teaching and research.

GISRAM has been successfully around for several years, and it furthermore builds on existing doctoral programs; no radical changes in the program structure seemed necessary. Thus, we only adapted the course numbers and the credit hours to the semester system. The one major change is the possibility for the students to select between two compulsory courses: besides Foundational Approaches to the Study of Religion, CS620 = new CS5970, there is now also the new course CL5401 ‘Methodologies for the Study
of Ancient Religions”. The two courses differ in their scope: the CS course is more geared towards general history of religions and contemporary religions; the new CL course focuses on the ancient world and the applicability of existing methodologies on historical religions. We request one of these two courses as compulsory and leave the decision to the specific needs and interests of the student.

- **Greek & Latin**: F. Graf (Greek and Roman religions, epigraphy), Sarah Iles Johnston (Greek religion, mythology), Carolina López Ruiz (archaic Greek culture; Western Semitic languages and cultures)
- **History**: Gregory Anderson (Greek History), Tim Gregory (Byzantine culture); Tina Sessa (Early Christianity)
- **History of Art**: Howard Crane (Ancient Near East); Mark Fullerton (Greek and Roman Art); Tim McNiven (Greek art and iconography)
- **Near Eastern Languages and Cultures**: Daniel Frank (late antique Judaism); Sam A. Meier (Semitic Languages and Cultures); Parveneh Pourshariati (Early Islam); Michael Swartz (Judaism in the Greco-Roman World); Georges Tamer (Early Islam in the Greco-Roman World)
- **Comparative Studies** does not participate in GISRAM in the sense that its students can add to their degrees; but the department is a key participant insofar as it teaches methodology and theory of Religious Studies (Lindsay Jones, Hugh Urban).

**Organization and Transition Policy:**

GISRAM has a program coordinator (presently F. Graf) and a Steering Committee that represents the five participating departments (one member each). The Steering Committee oversees the curriculum, monitors student progress, decides on the actual course list and on recognition of courses outside the participating programs, and monitors the programs performance. The coordinator oversees the day-to-day business, advises students and proposes and posts the actual course list.

The program coordinator, assisted by the steering committee, oversees the transition and advises students as to specific transition problems; when necessary, he will also contact the Graduate Directors of the respective participating department. Since the curriculum is very flexible, we do not foresee major transition problems. Credit toward GISRAM will be given for qualifying courses taken under the quarter system.

I attach

  (1) Curricular Rules
  (2) List of Qualifying Courses
  (3) Sample Programs

Sincerely yours

Fritz Graf, Distinguished University Professor
Chair of the Department of Greek & Latin
APPENDICES:

1. CURRICULAR RULES

1. General
The Specialization will be awarded in addition to the doctoral degree conferred by the department in which a given student is formally enrolled (Greek and Latin, History, History of Art, NELC); students thus will be expected to fulfill their department’s regular doctoral degree requirements. The Specialization adds both mandatory and elective courses.

The Specialization requires a minimum of 10 hours of graduate-level course work in at least three courses. Twenty hours of graduate level courses is the maximum allowance. Ten hours taken for the Specialization must be completed outside of the student’s home program. The student must receive a grade of B or better or S in each course comprising the Graduate Interdisciplinary Specialization (Graduate School Handbook [draft] sect. VIII 4).

To compensate for the additional course work, the student is encouraged to apply to her or his home department for a reduction of one regular course from among those of the home graduate program. If such a reduction is granted by the home department, the student’s advisor and the home department’s graduate director determine the exact nature of this reduction, in accordance with the student’s individual needs. Additionally, the elective course taken in a department other than the student’s home department can fulfill the requirement of his or her home program to take a course outside of that department.

A steering committee that represents the five participating departments will oversee the curriculum, monitor student progress, and evaluate the performance of the program.

2. Mandatory course
As early as possible in their graduate career, each student will complete either CL “5401 Methodologies for the Study of Ancient Religions” or CS 5970 “Foundational Approaches to the Study of Religion”. These courses introduce students to the concepts, categories, theories and methods used by various disciplines in the study of religion, and provide the basic methodological tools for working successfully with any religion.

3. Elective courses
A minimum of three courses, at the 6000-, 7000-, 8000- or (with permission of the advisor) 4000- or 5000-level that address some aspect of ancient Mediterranean religions. These may be offered both by the participating graduate programs and, after consultation with the student’s advisor, by any other department (including courses not listed on current GISRAM web-site).

2. LIST OF QUALIFYING COURSES

The following list is far from being inclusive, since the specific foci of courses in any given year will determine their eligibility. Some courses are specifically concerned with religion and thus are always eligible; in this list as well as in the course list published on the planned website of the Program, these courses are highlighted by an asterisk. The eligibility of other courses in any given quarter will be determined in advance by the steering committee, usually upon examination of the course syllabus.

The language requirements of each course will be valid for Specialization students in the same way as they apply for regular graduate students (e. g. if reading skills in Classical Arabic are required of enrolling NELC students, they will be required of other students as well). Again, there are courses that always carry such a restriction; here and on the course list on the future website, these courses are marked with the superscript letter L.
