July 21, 2011

To: W. Randy Smith, Vice Provost, Office of Academic Affairs  
From: Terry L. Gustafson, Special Assistant to the Executive Dean for Semester Conversion  
Re: Arts and Sciences Comments on FAES Minors

The Arts and Sciences Committee on Curriculum and Instruction (CCI) has reviewed the following minors from the College of Food Agriculture and Environmental Science (FAES). The CCI recommended changes to the minors, most of which were incorporated into the revised proposals. The specific comments that were left unaddressed are indicated below. All the minors were approved unanimously by the CCI.

For each minor, I am including the specific minutes from the CCI meeting addressing any outstanding issues for each minor.

1. **Animal Sciences Minor**
   - **Added 1 required course so that now minor is all prescriptive. Therefore, this is not a straight conversion. This is not a minimal change. It should be re-envisioned.**
     Vaessin, Stafford, unanimously approved (item in bold will be transmitted to CAA)

2. **Animal Nutrition Minor**
   - **Anim Sci 331: Course goes from 4 to 3 credits. Will this count in the transition as 3 credit hours or not? It might end up as a 2 credits, and then students might have to take another course. This should be clarified in the transition statement.**
     Daniels, Vaessin, unanimously approved (item in bold will be transmitted to CAA)

3. **Equine Science Minor**
   - **Term "required electives" used on advising sheet is confusing; better to drop "required".**
   - **Edu PAES 161: conversion credit can actually not be granted to ASC students. This should be specified in the transition.**
   - **Per J. Pfister's e-mail: ANIMSCI 3130 should be 3131; credits for ANIMSCI 3171 should be 2 credits not 3.**
     Daniels, Stafford, unanimously approved (items in bold will be transmitted to CAA)
4. Meat Science Minor
   • PACER form: Credit Hour Explanation: Column C: 2nd line: min: 7 (is this correct?); 3rd line: max: 12 (not 15)
Masters, Daniels, unanimously approved (item in bold will be transmitted to CAA)

5. Production Agriculture Minor
   • Minor goes from 3 to 4 categories; categories are re-envisioned. Therefore, the minor should be labeled as re-envisioned and an explanation should be provided.
   • Perhaps delete Credit Hour Explanation credits (on PACER form), except for first line.
   • There is no letter from the chair.
   • Prerequisites to courses should be indicated on advising sheet.
Masters, Stafford, unanimously approved (items in bold will be transmitted to CAA)

6. Society and Environmental Issues Minor
   • Section "Recruitment, advising and administration, resources, expenses and letters of concurrence": Last sentence about no letter of concurrence is no longer relevant. Letter of concurrence from Comparative Studies is provided. Concurrence from Geography and Earth Sciences is assumed.
   • It would be good to add prerequisites (or at least a generic statement) on advising sheet since many of the courses are upper-level.
Daniels, Stafford, unanimously approved (items in bold will be transmitted to CAA)

7. Landscape Construction Minor
   • PACER form: Credit Hour Explanation: Column C: 2nd line: 15 (instead of 13); 3rd line: 15 (instead of 16).
   • Semester advising sheet:
     ■ The Landscape Construction minor consists of 15-16 credit hours…": rephrase to "a minimum of 15 credit hours".
     ■ 1000-level courses are not permitted in ASC minors. Suggestion to take Consysmt 1205 out and make it a prerequisite.
     ■ Point 6 at bottom of page: "at least two courses must be at the 3000 level or above": rephrase to "6 credit hours" since some courses are not 3 credits.
     ■ Consysmt 2241 (Construction Materials and Methods II): Is part I a prerequisite for this course?
   • No transition statement.
Stafford, Vaessin, unanimously approved (items in bold will be transmitted to CAA)

8. Youth Development Minor (quarter and semester versions)
   • HCRD (FAES) will provide advising for the minor.
   • Quarter advising sheet: minor consists of a minimum of 24-26 hours: this should say "minimum of 24 hours"
   • Overlap between minors: unique hours should be 20.
Stafford, Daniels, unanimously approved (items in bold will be transmitted to CAA)

9. Sustainable Agriculture Minor
   • A 3-hour maximum prerequisite is listed on the PACER form, but it is unclear where this comes from.
• Minor has many upper-level courses. Unclear which of the courses have prerequisites.
• Proposal should include a statement that will allow quarter courses to count on the semester minor.

Vaessin, Masters, unanimously approved (items in bold will be transmitted to CAA)

10. Forestry, Fisheries, and Wildlife Minor
• Minor has many upper-level courses. Unclear which of the courses have prerequisites.
• Description of the requirements, second paragraph, outlines 3 courses to be taken in a focus area, but on the advising sheet it is not clear which is the required course.

Vaessin, Daniels, unanimously approved (items in bold will be transmitted to CAA)
Society and Environmental Issues Minor

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

**Program Learning Goals**

- Gain an introduction to diverse human dimensions surrounding environmental issues, specifically at three levels: individual, community, and polity, for developing and maintaining environmental quality amid increasing human demands on the environment.
- Gain a basic understanding of how human and natural systems together affect environmental quality.
- Gain familiarity with various social science disciplines and additional depth of understanding in particular human dimensions of interest.

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.
Pre-Major

Does this Program have a Pre-Major? No

Comments

- The semester advising sheet includes the semester course list.

  The "maximum" 6 additional prerequisite credits noted above in the Credit Hour Explanation would be required only for students who choose AED 5310 (requires ECON 2000 at 3 credits) *and* ENR 6280 or ENR 5649 (both require ENR 4000 at 3 credits) as electives.

  Concurrence letter from Comparative Studies is attached; concurrence from Geography and Earth Sciences is pending (requested 6/2/11).

  Expanded rationale has been added in semester advising and expanded rationale attachments to explain target audience and how the minor fits in with other minors.

  A summary of revisions in response to Sciences subcommittee has been attached as: MinorsChangesReq.doc. (by Hitzhusen, Gregory Ernest on 06/05/2011 07:02 PM)

- Feedback will come in e-mail from Jim Fredal (chair CCI Sciences Subcommittee). (by Vankeerbergen, Bernadette Chantal on 02/15/2011 04:26 PM)

Re: School of Environment and Natural Resources Semester Program Proposals

The faculty and staff of the School of Environment and Natural Resources (SENR) have completed a thorough review and revision of our undergraduate and graduate curricula in preparation for the conversion to semesters, and the SENR faculty has voted to recommend that the Office of Academic Affairs approve the attached semester curriculum proposals. In addition to the work of several curricular sub-committees within the School, the SENR Academic Affairs Committee reviewed and approved all semester conversion plans for undergraduate programs, and the SENR Graduate Studies Committee reviewed and approved plans for the MS, PhD, and MENR graduate programs. SENR faculty approved these semester plans by unanimous vote (25 in favor, 0 opposed, 0 abstentions) on April 16, 2010; subsequent minor revisions and updates to the plans have been approved by SENR curriculum committees as appropriate.

The following outline details the SENR programs proposed for semester: A) conversion, B) new approval, C) deactivation, and D) termination.

A. Existing SENR programs to be converted to semesters include:
(Note: Rural Sociology programs included below became part of SENR in 2010; program degree codes are in parentheses following program titles; specialization three-letter codes are in parentheses following specializations.)

Four Undergraduate Majors:
1) Environmental Science (ENVSCI-BS): modified from four to five specializations representing existing focal areas in the major, including Ecosystem Restoration (ECR), Water Science (WTR), Environmental Molecular Science (EMS), Soil Resources and Environmental Sustainability (SOI), and Environmental Science Education (ESE).
2) Forestry, Fisheries, and Wildlife (FFW-BS): converted as semester equivalent, with appropriate revisions to maintain certification and double-certification options uniquely available (compared with other programs nationally) to students in this major, including Society of American Foresters (SAF) accreditation and The Wildlife Society (TWS) and American Fisheries Society (AFS) certifications. Three-letter specialization codes for FFW specializations (FAS, FOR, FWM, UFW, WFS, WPV, WLS) are detailed in the comment field of the FFW-BS program request.
3) Environmental Policy and Decision Making (ENVPDM-BS): modified in title (previously Environmental Policy and Management (EPM)) and designating three specializations based on existing focal areas in the major: Climate Change (CCP), International Issues (IIP), and Water Conservation (WCP).
4) Natural Resource Management (NATRESM-BS): modified in title (previously Parks, Recreation & Tourism (PRT)) and designating three specializations based on existing and emerging focal areas (made possible by the addition of Rural Sociology faculty to SENR in 2010) in the major: Parks and Recreation Management (PRM), Natural Resource Administration and Management (NRA), and Sustainable Agriculture (SAG), with additional focus-area options (non-transcript) aligned with employment opportunities and existing programs in the School: Forestry, Fisheries, Wildlife, Soil and Water, Visitor Services, and Zoo Science and Management.

Two Undergraduate Minors:
1) Soil Resources (SOILSCI-MN): converted as semester equivalent.
2) Rural Sociology (RURLSOC-MN): converted as semester equivalent.
Two Graduate Degree Programs:
1) Master of Science (ENVNATR-MS): converted as semester equivalent
2) Doctor of Philosophy (ENVNATR-PH): converted as semester equivalent
The Environment and Natural Resources Graduate Program awards both MS and PhD degrees in seven areas of specialty (all converted as semester equivalents):
- Ecological Restoration (ERS)
- Ecosystem Science (ECS)
- Environmental Social Sciences (ESS)
- Rural Sociology (RS)
- Fisheries and Wildlife Science (FWS)
- Forest Science (FS)
- Soil Science (SSC)

Three Graduate Minors (all converted as semester equivalents):
1) Environment and Natural Resources (ENVNATR-GM)
2) Soil Science (SOILSCI-GM)
3) Rural Sociology (RURLSOC-GM)

One Professional Degree Program (converted as semester equivalent):
1) Master of Environment and Natural Resources (ENVNAT-MEN)

Three Combined Programs (all combined programs will be converted as semester equivalents, and impose no additional requirements or provisions beyond the requirements of the combined degrees. As such, and abiding all college and university rules of the degree-granting partners, forms for these combined degrees are not included in these SENR semester electronic program proposals):
1) Combined BS/MS
2) Combined BS/MENR
3) Dual Degree Program with the John Glenn School of Public Affairs: MS/MAPPM (Master of Arts in Public Policy and Management) or MS/MPA (Master of Public Administration)

B. New SENR semester programs proposed for approval by OAA:
Four undergraduate minors have been developed for semesters. Three minors correspond with existing majors in the School; these three minors collectively replace the Natural Resources Management minor. The fourth minor, Sustainable Agriculture, has been developed through the collaboration of Rural Sociology and Soils faculty, together with colleagues from across the College of Food, Agricultural and Environmental Sciences.

Undergraduate Minors:
1) Environmental Science (ENVSCI-MN)
2) Forestry, Fisheries & Wildlife (FFW-MN)
3) Society and Environmental Issues (SOCENV-MN)
4) Sustainable Agriculture (SUSTAGR-MN)

C. SENR programs to be deactivated:
Each listed below is an old program name that has been replaced by current programs listed above, either through revised titles (1-3), or being subsumed as a specialization into the ENR MS and PhD (4-9). With the exception of Rural Sociology, which joined SENR in 2010, each of these changes were effected three or more years ago.

1) Fisheries and Wildlife Management (FWMGT-BS)
2) Forestry and Urban Forestry (FORUF-BS)
3) Human Dimensions in Natural Resources (HDNR-BS)
4) Natural Resources (NATRES-PH)
5) Natural Resources (NATRES-MS)
6) Rural Sociology (RURLSOC-MS)
7) Rural Sociology (RURLSOC-PH)
D. SENR programs to be terminated:
1) Natural Resources Management Minor (NATREM-MN): this minor is being terminated because of its broad scope and is being replaced by the more specific new minors listed above that correspond to existing majors.

SENR faculty and staff have worked tirelessly to develop these plans, engaging in a thorough and collegial process. Two faculty retreats devoted significant time to semester conversion plans, and all faculty meetings beginning in the fall of 2009 included updates and discussion about semester conversion planning. Dr. Greg Hitzhusen was appointed by the School as a point person to facilitate Q2S planning, participated in regular UCAT Q2S workshops with colleagues from across the university, and established a Carmen site to share and organize Q2S working documents and resources. In addition to the committees mentioned above, several new committees led the curriculum development process, including four faculty working groups formed within each of the majors, and a core curriculum committee of a dozen faculty representing all of the specializations across the four undergraduate majors and including myself and the chairs of the Grad Studies Committee and Academic Affairs Committee. These groups reviewed all recent SENR curriculum revisions, researched semester programs of peer institutions, and generated creative proposals of how to improve and better integrate our multi-disciplinary curriculum. Curriculum mapping revealed gaps and overlap in our curriculum; to match our semester courses to our learning goals, at least nine new courses have been proposed, several others have been merged, and at least 75 courses will be discontinued. As a previous director of a Natural Resources program that underwent semester conversion at the University of Georgia, I provided guidance to revise SENR’s curricular offerings around our core strengths, guided by learning outcome goals and encouraging options beyond existing structures and traditions. Several SENR faculty and staff participated in the College of Food, Agricultural, and Environmental Sciences bi-weekly Q2S Implementation Committee meetings starting in November 2009, sharing planning ideas with Q2S point people from across the College.

We also based our semester curriculum development on several faculty-led research efforts. Our social science faculty created a survey of environmental curriculum interests and career goals for CFAES, SENR and OSU undergraduate student samples, and results from over 1300 respondents (published results now in press) informed our vision of student interests, needs, and knowledge about the environmental topics addressed in SENR programs. We also completed phone interviews with SENR alumni and stakeholders to examine curricular elements most valuable to graduates and employers. And I conducted exit interviews of SENR students to better understand their experience in SENR programs. These measures and the efforts mentioned above collectively led the faculty to propose an expanded core of courses to help SENR students better integrate natural and social science elements of the curriculum, and to modify the majors as described above. The core curriculum committee will remain intact to monitor the quality and success of the semester curriculum, and make revisions as appropriate into the future.

This proposed curriculum represents welcome changes that increase the efficiency and complementarity of SENR programs, maximizing the expertise of our faculty and improving opportunities for SENR students to prepare for graduate education and succeed in their professional careers. I have also attached a commentary detailing SENR’s preliminary assessment plans for semester programs. These program proposals reflect the outstanding collaborative efforts of SENR faculty to prepare for the semester transition. I heartily recommend approval of these plans, and appreciate OAA’s ongoing efforts to strengthen our curriculum in OSU’s transition to semesters.

Ronald L. Hendrick, Ph.D.
Director, SENR
Summary of ENR Minor Programs Revisions

Summarized below, in red type, are the revisions to ENR minors in response to the requests of the Science subcommittee of the Arts and Sciences CCI. All of the changes indicated below have been made within the minor program proposals in the PACER system, and resubmitted.

Subject: FW: Semester Conversion Proposal for FAES Minors
Date: Tue, 01 Mar 2011 11:18:00 -0500
From: Jill Pfister <pfister.1@osu.edu>

Two common changes that we need to make on all of the minor sheets include the following.

1. Please include a statement that reads "At least six credits must be at the 3000 level or above" and be sure the minor is set up that way. Done.
2. Guideline #4 at the bottom, which is common across the college, should read "A maximum of one course may overlap between the minor and the GE (Writing and Communication, Foreign Language, Literature, Visual and Performing Arts, Culture and Ideas, Historical Study, Quantitative Reasoning, Data Analysis, Natural Science, Social Science, Cross-Disciplinary Seminar, Service-Learning, Education Abroad). Please be sure this statement is revised to reflect the above statement. Done.

Subject: FAES Semester Conversion Proposals

Date: March 4, 2011

Jill:
We are requesting a few changes and corrections on the minors before we send them forward to the full CCI.

Forestry, Fisheries and Wildlife:
· This minor had a number of extraneous documents that should be removed. Done.
· The proposal will need a transition plan for students who are finishing the old Natural Resources minor to clarify what their options are (this will apply to Environmental Science and Society and Environmental Issues as well). The material on the hyperlink is not available, and whatever transition plan is devised should be copied directly into the proposal. ENR minors transition plan has been uploaded to proposal.
· On the PACER form, the minimum required credit hours outside the unit should be
filled in as "0." Done.
· All references to GEC should be changed to GE. Done.
· All courses should be listed with appropriate credit hours. Done.
· Finally, there was a question about the advising sheet. The second paragraph states that "One course is required within each focus area" and then "Two additional courses are required within each focus area". This seems to suggest that students take courses in all three focus areas, but the list suggest that in fact students take all three elective courses within one chosen focus area. So, while we understood the intent of that paragraph, the language was initially confusing and could probably be reworded (or even eliminated) to clarify that students merely need to select three courses within one focus area. Text was revised to eliminate confusion as suggested.

Sustainable Agriculture:
· Extraneous documents should also be removed from this proposal. Done.
· References to the GEC changed to GE. Done.
· The program learning goals on the PACER form need to match those listed later under "expected learning outcomes." Also, some of the PACER goals seemed rather general, referring alternately to "several aspects," of sustainable agriculture, "various goals of sustainability," "deeper dimensions of sustainability," and "various dimensions of sustainable agriculture." These goals should probably be made more specific to the content of the minor, or could be eliminated altogether, since learning goals are not a requirement for minor proposals. In other cases, the language might be revised. For example, "planning and executing the student farm," might be "developing and executing plans for the student farm," etc. Learning goals have been revised to be more specific and to be consistent, as requested.
· Finally, quarter numbers should be replaced by semester numbers on the advising sheet, and credit hours should be clear for all courses. Done.

1) Soil Science Minor
· On the PACER form, under the Credit Hour Explanation, on the third line, column A should list 23 credit hours; column C should list 16 credit hours. Done.
· The proposal needs a specific transition plan. ENR minors transition plan has been uploaded to proposal.
· Documents extraneous to the proposal (from the website) should be removed. Done.
· The proposal should provide two discrete advising sheets (one for quarters, one for semesters) using the same format to facilitate comparison. I think this was already done – the quarter advising sheet only differs in format due to final graphics there that will not be finalized for semester version until fall of 2011; thus, done.
· On the advising sheet, guideline #4 refers to the GEC (should be GE) and the categories should align with the GE categories (categories on the advising sheet currently reflect GEC-R requirements). This point is the case for most FAES advising sheets. Done.

2) Rural Sociology Minor
• On the PACER form, under the Credit Hour Explanation, the next to the last line should be filled in with zeroes. Done.
• The proposal needs a specific transition plan. ENR minors transition plan has been uploaded to proposal.
• Documents extraneous to the proposal (from the website) should be removed. Done.
• Several courses, including the required Rurl Soc/ENR 5500, are at the 5000-level or above. This number was designated for undergrad/graduate courses and seems quite advanced for courses (including the entry level course) in the minor. There are no rules limiting the upper range of course numbers for ASC minors, but the committee wanted to query this numbering scheme. Minor sheet has been revised in online proposal: of the two required courses for the minor, one is 3000-level, and the other, ENR 5500, is intended more as a capstone for the minor. Students may choose from a range of courses from 2000-level and above to fill in the remaining two courses required for the minor.
• On the last page, guideline #4 refers to the GEC (should be GE) and the categories should align with the GE categories (current categories reflect GEC-R requirements). This point is the case for most FAES advising sheets. Done.

3) Society and Environmental Issues Minor (new)
• On the PACER form, under the Credit Hour Explanation, a 4-hour prerequisite is listed, but is not explained anywhere else on the proposal. If this is a course prerequisite, it might just be noted on the advising sheet. If it is a prerequisite for the minor, it should be listed on the advising sheet and explained in the proposal. Done, and comment added to clarify.
• The learning goals on the PACER form and the learning outcomes inside the proposal should match. Done.
• The proposal needs letters of concurrence from 3 departments: Geography, Earth Sciences, and Comparative Studies. Concurrence received from Comparative Studies (6/2/11), and currently pending from Geography and Earth Sciences (request sent 6/2/2011).
• Documents extraneous to the proposal (from the website) should be removed. Done.
• The proposal could use an expanded rationale that explains who the target audience is for the minor (especially among ASC students), and how the minor fits in with their other minors. Done.
• Add credit hours for all courses on the advising sheets. Done.
• On the last page, guideline #4 refers to GEC (should be GE) and the categories should align with the GE categories (current categories reflect GEC-R requirements). This point is the case for most FAES advising sheets. Done.

4) Environmental Science Minor (new)
• On the PACER form, under the Credit Hour Explanation: Minimum prerequisite hours are listed as 3 and maximum prerequisite hours are listed as 40? Are these numbers correct? If so, a note should be added to the semester advising sheet,
prerequisite courses should be added to the course listing and an explanation should be added to the proposal. Credit Hours are now revised in proposal. The 40 hours was due to a single course with several high level prerequisites that have been removed from that course’s semester conversion proposal.

- Documents extraneous to the proposal (from the website) should be removed. Done.

- Learning “goals” on the PACER form and the learning “outcomes” listed in the proposal should match. Done.

- Several courses for this minor are at the 5000-level or above. This number was designated for undergrad/graduate courses and seems quite advanced for courses in the minor. There are no rules limiting the upper range of course numbers for ASC minors, but the committee wanted to query this numbering scheme. Yes, this minor is intended to include these higher level courses. Most of the courses within the minor are below the 5000 level; in the list of required electives, where students will choose one course, options range from 3000-5000 level, with the 5000-level courses being ones whose prerequisites would be met earlier in the minor. This simply reflects the course sequences in ENR, and that this is a minor in a specific applied science.

- Letters of concurrence should probably be secured from Geography & Earth Sciences. As indicated in an earlier reply, because SENR already offers the Environmental Science major, and this minor simply conforms to the existing major, concurrence should not be needed.

- The proposal should include an expanded rationale that explains who the target audience is (especially for ASC students) and how minor fits with other minors. Done.

Thanks.

Jim Fredal

Cc: Bernadette Vankeerbergen
Society and Environmental Issues Minor (SOCENV-MN)

The minor in Society and Environmental Issues (SOCENV-MN) is based on the core social science courses found in the Environmental Policy and Decision Making (ENVPDM-BS) and Natural Resources Management (NATRESM-BS) majors in SENR.

In general, the minor is meant to be broadly applicable to those students interested in gaining specific knowledge and experience about humans and environmental problems in order to increase their marketability in a world where the interaction between humans and the environment is being recognized as increasingly important. The minor is useful for students majoring in the humanities and traditional social science disciplines across the University (e.g., psychology, sociology, communications, etc.) who may also be interested in studying specific environmental issues and gaining a greater understanding of how human systems play a role in creating and remediating environmental problems. This minor is also useful for those students majoring in disciplines closely associated with the biological and physical sciences (e.g., geology, chemistry, etc) to add an understanding of the interplay between the environment and human systems to the in-depth understanding of natural systems and processes gained from their own major.

The minor in Society and Environmental Issues aims to introduce students to the diverse human dimensions surrounding environmental issues, specifically the role of individuals, communities, and political institutions in developing and maintaining long-term environmental quality in the face of increasing human demands on resources and the environment. Students will develop a basic understanding of both human and natural systems through the required core coursework, as well as have the opportunity to select courses that deepen their understanding in a particular human dimension of interest. A total of 15 semester hours are required for the minor.

Expected learning outcomes:

1) Students will gain an introduction to diverse human dimensions surrounding environmental issues, specifically at three levels: individual, community, and polity, for developing and maintaining environmental quality amid increasing human demands on resources and the environment.
2) Students will gain a basic understanding of how human and natural systems together affect environmental quality.
3) Students will gain familiarity with various social science disciplines and additional depth of understanding in particular human dimensions of interest.

Assessment of outcomes:
Student learning outcomes in the Society and Environmental Issues Minor will be assessed in several ways:
1) Classroom assignments: controlled electives in the minor have been selected from existing courses in the ENR environmental social science majors (Environmental Policy and Decision Making, Natural Resource Management) to provide a range of topics to explore in depth, and a primary measure of success in the minor is student success in the assignments in these courses. ENR 2300 (Society and Natural Resources) and ENR 2100 (Introduction to Environmental Science), the required courses in the minor, provide basic background required of all ENR social science majors; course assignments in these classes measure success in the basic background material of the minor.

2) Student evaluation of instruction: students in the minor will complete course and program evaluations throughout the program, and results from these evaluations are incorporated into program and course revision.

Recruitment, advising and administration, resources, expenses and letters of concurrence:

The minor is based on the coursework already offered within the Environmental Policy and Decision Making and Natural Resource Management majors in SENR. In preparation for the semester conversion, ENR faculty surveyed students across the university; results revealed a high level of interest in issues of society and the environment and natural resources. The SOCENV minor matches this interest and demand, and recruitment through normal announcement and advising networks will suffice to populate the minor; special announcements of new curricular opportunities available in semesters will add to these efforts.

Administration of the minor within the School of Environment and Natural Resources will not impose additional administrative burden. All courses in the minor are currently fully supported by ENR as components of the ENVPDM-BS and ENVNATR-BS majors, including relatively new ENR courses gained by the addition of the Rural Sociology department to SENR in 2010, and can be serviced with existing faculty and teaching capacity. This minor will not incur additional expenses beyond anticipated teaching and administration budgets. Letters of concurrence have not been sought from other units because this minor simply draws from the existing ENR environmental social science majors.
Undergraduate Minor in Society and Environmental Issues

The minor in Society and Environmental Issues aims to introduce students to the diverse human dimensions surrounding environmental issues, specifically the role of individuals, communities, and political institutions in developing and maintaining long-term environmental quality in the face of increasing human demands on resources and the environment. Students will develop a basic understanding of both human and natural systems through the required core coursework, as well as have the opportunity to select courses that deepen their understanding in a particular human dimension of interest.

In general, the minor is meant to be broadly applicable to those students interested in gaining specific knowledge and experience about humans and environmental problems in order to increase their marketability in a world where the interaction between humans and the environment is being recognized as increasingly important. The minor is useful for students majoring in the humanities and traditional social science disciplines across the University (e.g., psychology, sociology, communications, etc.) who may also be interested in studying specific environmental issues and gaining a greater understanding of how human systems play a role in creating and remediating environmental problems. This minor is also useful for those students majoring in disciplines closely associated with the biological and physical sciences (e.g., geology, chemistry, etc) to add an understanding of the interplay between the environment and human systems to the in-depth understanding of natural systems and processes gained from their own major.

A total of 15 semester hours are required for the minor.

Required Core Coursework (6 units):

ENR 2100: Intro to Environmental Science (3 units)
ENR 2300: Society and Natural Resources (3 units)

Required Electives: (9 units)
Add 3 courses to meet the 15 hr minimum requirement:

AED 5310: Environmental and Natural Resources Economics (3 units)
ENR 3400: Psychology of Environmental Problems (3 units)
ENR 3500: Communities and the Environment (3 units)
ENR 3470: Religion and Environmental Values (3 units)
ENR 4000: Environment and Natural Resources Policy (3 units)
ENR 5640: Natural Resources Program Planning (3 units)
ENR 5649: Wildlife Conservation Policy (3 units)
ENR 6280: Water Institutions and Policy (3 units)
RURLSOC: 3578: Social Groups in Developing Societies (3 units)
RURLSOC: 4542: Leadership and Community Development (3 units)
RURLSOC: 5566: Rural Poverty & Environment (3 units)
RURLSOC: 7562: Innovation Diffusion (3 units)
1. The minor is not available to student majoring in Environmental Policy and Decision Making; Environmental Science; Natural Resources Management; Forestry, Fisheries and Wildlife.

2. A minimum overall GPA for courses comprising the minor shall be 2.00.

3. A minor should be declared at the time a student accumulates 60 hours.

4. A maximum of one course may overlap between the minor and the GE (Writing and Communication, Foreign Language, Literature, Visual and Performing Arts, Culture and Ideas, Historical Study, Quantitative Reasoning, Data Analysis, Natural Science, Social Science, Cross-Disciplinary Seminar, Service-Learning, Education Abroad).

5. Courses taken on a pass/non pass basis may not be applied to the minor.

6. At least six credits must be at the 3000 level or above.
School of Environment and Natural Resources
Transition Plan for ENR Minors

This transition plan covers all existing ENR minors, including:

**Soil Science Minor** (converted)
**Rural Sociology Minor** (converted)
**Natural Resources Management** (terminated*)
*The NRM minor is being replaced in semesters by three more specific minors (each corresponding with and derived from the four existing majors in ENR):
  - **Forestry, Fisheries and Wildlife Minor** (FFW major)
  - **Society and Environmental Issues Minor** (EPDM and NRM majors)
  - **Environmental Science Minor** (ES major)

Students in all ENR minors may complete the minor as it was offered in quarters, simply by completing the semester equivalents of the courses they would have completed to meet the requirements of the minor under quarters. Each minor includes a sufficient selection of converting courses to make completion possible; any courses not converted to semesters will simply be unavailable as options starting in Autumn of 2012. There will be no attempt to create bridge courses.

Current students in ENR minors will be contacted before the start of the Autumn 2011 quarter with a list of available semester courses to complete their minor; any courses that will be terminated in semesters will be highlighted with encouragement for interested students to take them in 2011-2012.

Students in the **Natural Resources Management** (NRM) Minor (currently, the minor has 35 students: 21 in FAES, 2 in ASC, 3 in BIO, 1 in BUS, 1 in ENG, 1 in HUM, and 6 in SBS) will have the option of either completing the NRM Minor with semester equivalent courses, or changing their minor to one of the more specific new minors that are replacing the NRM minor. Because these new minors require fewer overall credits than the NRM minor, this may mean that some students working toward an NRM Minor will already have met the requirements of one of the new minors once semesters begin.

Enrollment in the NRM Minor will no longer be allowed starting Summer Term, 2012.
SCHOOL OF ENVIRONMENT AND NATURAL RESOURCES  
REQUEST FOR ACADEMIC REVIEW AND CONCURRENCE

The purpose of this form is to provide external College/Department comment and concurrence to a proposed change to the academic curriculum within the SCHOOL OF ENVIRONMENT AND NATURAL RESOURCES. A letter may be substituted for this form.

Academic units receiving this form are asked to respond to Section B and return the form to the School of Environment and Natural Resources, 210 Kottman Hall, 2021 Coffey Road.

We seek to resolve an curriculum issues prior to forwarding this form and all other accompanying documentation to the Office of Academic Affairs.

A. Information from academic unit initiating the request:

Initiating Academic Unit: SCHOOL OF ENVIRONMENT AND NATURAL RESOURCES

Proposed Minor: Society and Environmental Issues

Minor to be replaced: Natural Resources Management

Effective Quarter/Year: Summer Quarter 2012

Type of Request: ☐ New Major ☐ Revised Major ☑ New Minor ☐ Revised Minor

Academic Units with related interests asked to review the request:
School of Earth Sciences
Department of Comparative Studies
Department of Geography

Date responses are needed: June 15, 2011

B. Information from academic units reviewing the request:

☐ The academic unit supports the proposal

☐ The academic unit does not support the proposal.
Please explain:

☐ The academic unit suggests:

Signature of Department Chair: Eugene W. Holland
Print Name: 6/2/11
Date:
