Dear Dr. Smith,

Attached is the proposal to revise the Dietetics specialization of the Human Nutrition major program with concurrence from the School of Health and Rehabilitation Sciences.

Thank you,
Sarah

Sarah A. Odum, MA  Curriculum Coordinator
The Ohio State University
College of Education and Human Ecology  Academic Affairs
614-292-3180 Office

Bryan:

The Council on Academic Affairs, at its meeting on April 15, 2015, tabled the proposal from the Department of Human Nutrition, College of Education and Human Ecology, to revise the Dietetics specialization of the Human Nutrition major program, until the College has informed the School of Health and Rehabilitation Sciences of the proposed change and has received a response. I suggest that you contact Professor Deborah Larsen, Director of the School.

Please keep me informed, and if I can be of help, just let me know.

Randy

The Ohio State University

W. Randy Smith, Ph.D.
Vice Provost for Academic Programs
Office of Academic Affairs

614-292-5881 Office
Memo

January 20, 2015

To:     Randy Smith, Vice Provost of Academic Programs
          Melissa Newhouse, Program Manager

CC:    Andrew Zircher, Director of Assessment and Curriculum
          Sarah Odum, Curriculum Coordinator

From:   Bryan Warnick, Associate Dean of Academic Affairs

RE: CURRICULUM UPDATE: BACHELOR OF SCIENCE IN NUTRITION, HUMAN NUTRITION

The faculty and administration of the College of Education and Human Ecology (EHE) have approved revisions to the Bachelor of Science in Nutrition, Human Nutrition major, Dietetics specialization in the Department of Human Sciences. The request is to add the lab course HUMNNTR 5622 as a required major course. The proposal was approved by the EHE Curriculum Committee on September 15, 2014.

Attached to this memo are the following:
   1. Program proposal
   2. Proposed program sheet
   3. Proposed curriculum map

EHE approves the revisions to the Bachelor of Science in Nutrition, Human Nutrition major, Dietetics specialization in the Department of Human Sciences and requests approval from the Council on Academic Affairs. If there are any questions, please contact me at Warnick.11@osu.edu or our curriculum coordinator, Sarah Odum, at odum.11@osu.edu.
Dear Curriculum Committee Members:

The College of Education and Human Ecology, Department of Human Sciences is eager to introduce the following curriculum change to the Human Nutrition, Dietetics Specialization program. Program faculty and staff propose the addition of a 1-credit hour laboratory course for the upcoming Spring 2015 academic term, **HUMN NTR 5622 Medical Nutrition Therapy Lab 2**. The purpose of this course is to build upon the content of the HUMN NTR 5611 and 5612 Medical Nutrition Therapy lecture series in order to provide students with a laboratory and practical application of the nutrition care process through assessment, management and treatment of various disease states.

Currently the Dietetics program meets all necessary curriculum and knowledge requirements set forth by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), which is the Academy of Nutrition and Dietetics’ accrediting agency for education programs preparing students for careers as registered dietitians (RD) or dietetic technicians, registered (DTR). Faculty and staff believe the addition of a Medical Nutrition Therapy laboratory course will strengthen the curriculum, student performance and program outcomes. In addition, based on the results of our annual student exit surveys, we consistently receive feedback pertaining to program improvement to include more “hands-on, practical” experience in the curriculum.

Included in this proposal is an updated Dietetics program sheet and curriculum map to outline the effects of this course change.

Please let us know what questions you have.

**TOTAL HOURS REQUIRED**  
**Minimum:** 120  
**Without overlap:** 127

---

1 English 1110.03 must be taken concurrently with English 1193.03
2 Students must complete two Global Issues courses, which are typically met by selecting Literature, Art, Cultures & Ideas, or Historical Study courses that meet this requirement.
3 Students must complete one Social Diversity in the US course, which is met by taking PSYCH 1100.
4 Foundational Science and Social Science Requirements are requirements of the Didactic Program in Dietetics, accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND)
5 May double-count with 1 Open Option GE
**CURRICULUM MAP: DEPARTMENT OF HUMAN NUTRITION UNDERGRADUATE PROGRAM**

**PROGRAM GOAL #1**
CRITICAL THINKING: Students will learn to use critical thinking, evidence-based principles, and current information to analyze situations, issues, and problems.

**PROGRAM GOAL #2**
COMMUNICATION: Students will learn how to communicate effectively, both orally and in writing.

**PROGRAM GOAL #3**
ETHICS: Students will learn how to reason and act consistently in an ethical fashion, with honesty, integrity, fairness, objectivity, sensitivity to cultural differences, and respect for the unique needs and values of individuals.

**PROGRAM GOAL #4**
SOCIAL RESPECTIBILITY/LEADERSHIP: Students will develop awareness of contemporary issues and public policies, learn how to become involved and act with social responsibility, and develop leadership abilities.

**PROGRAM GOAL #5**
RESEARCH: Students will demonstrate their understanding of the scientific method, including research methods important in the study of nutrition, and research opportunities that exist in companies, government agencies, and universities.

**PROGRAM GOAL #6**
SCIENCE: Students will demonstrate understanding of physical and biological sciences, including biochemistry, physiology, and molecular genetics, as well as social and behavioral sciences, and ability to apply these scientific principles to study of nutrition.

**PROGRAM GOAL #7**
NUTRIENT FUNCTION: Students will gain an in-depth understanding of the digestion, absorption, metabolism and functions of nutrients and other bioactive dietary compounds at the whole body, cellular and molecular levels, especially in relation to health and disease.

**PROGRAM GOAL #8**
NUTRITION ASSESSMENT/DIET PLANNING/LIFE SPAN: Students will learn to assess nutrient needs across the life span and gain a broad perspective in nutrition assessment and diet selection and planning.

**PROGRAM GOAL #9**
ENERGY BALANCE, FITNESS AND PHYSICAL ACTIVITY: Students will learn fundamental concepts of energy balance including practices in fitness and exercise science, and will gain understanding of the combined areas of physical activity and nutrition.

**PROGRAM GOAL #10**
FOOD SCIENCE/FOOD SAFETY: Students will demonstrate their understanding of the science of food, food systems, and food safety issues related to the science of food, food systems, and food safety issues related to the nutrition.

Hi Sarah,

Below is concurrence for the HN program change. Could you attach it to the proposal and/or forward it along to OAA.

Best,
Bryan

---

Hi Deborah,

In reconsideration, we approve this change.

Deborah S. Larsen, PhD
Professor and Director,
School of Health and Rehabilitation Sciences
Associate Dean, College of Medicine
453 W. 10th Ave.
Columbus, OH 43210
Phone: 614-292-5645
Fax: 614-292-0210

Hi Deborah,

This is not a new course, nor is it a new program. It is a very minor revision to an existing program sheet and, as you can see below, there is not an equivalent hour course offered by your school. I'm not sure I understand the need for the delay. Could you explain?

Bryan

As you likely know, the University is looking at the nutrition programs on campus, specifically your dietetics and our medical dietetics programs. It would seem prudent to pause in moving new courses/programs forward until the review is complete to avoid this ongoing duplication of coursework/programs.

Deborah S. Larsen, PhD
Professor and Director,
School of Health and Rehabilitation Sciences
Associate Dean, College of Medicine

Dear Dr. Larsen,
I hope you are well.

I wanted to follow up with the course below. The faculty are anxious to know whether they can move forward with this, but have not received any response since April 27. In the emails below, we detail the differences between HN 5622 (an already approved course) and MEDDIET 4925.

Does that seem different enough, from your perspective, to receive your concurrence? Let me know what you think.

Best,

Bryan

Subject: RE: Seeking your support for a revision to the BS in Nutrition

Hi Gene,

Medical Dietetics has a series of courses called Nutrition Care Process I-VI (MEDDIET 4910-4925) Within this series they have two lab classes (MEDDIET 4912 & 4925). The one most similar to our lab proposal would be MEDDIET 4925, but there are some important distinctions and reasons why we are proposing our lab rather than sending our students to MED DIET.

Here is MED DIET course description:

**MEDDIET 4925 - Nutrition Care Process VI**

<table>
<thead>
<tr>
<th>Course Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Units</td>
</tr>
<tr>
<td>Grading Basis</td>
</tr>
<tr>
<td>Campus</td>
</tr>
<tr>
<td>Career</td>
</tr>
<tr>
<td>Course Components:</td>
</tr>
</tbody>
</table>

**Enrollment Information**

**Course Attributes:**

**Description**

Laboratory and experiential application of the nutrition care process for disorders of hepatobiliary, renal, neurological, respiratory, critical care, cancer, AIDS, and inborn errors of metabolism.  
Prereq: Enrollment in MedDiet. Concur: 4923 and 4924. Not open to students with credit for 519, 520, 521, 5 30, or 636.

HN 5622 is a one credit hour lab (2 clock hours) designed to be taken concurrently with our current HN 5612 Medical Nutrition Therapy 2 class.  
The topics covered in the proposed HN 5622 lab supplement the material covered in HN 5612 (Upper/Lower GI Disorders, Bariatric Surgery, Parenteral Nutrition, Food Allergies and Intolerances, Diseases of Liver/Gallbladder/Exocrine Pancreas Disorders, Pulmonary Disease, Heart Failure, Anemia, Renal Disorders, Metabolic Stress, HIV/AIDS). The MEDDIET 4925 does not cover the same topics taught in HN 5612 (though there is some overlap) and is not designed to complement our current MNT 2 class.
We are proposing only a 1 credit, 2 clock hour lab because we are a didactic program and our students will complete a dietetic internship upon graduation, where they will gain further training in application of the nutrition care process. Medical dietetics is a coordinated program that incorporates the supervised practice (dietetic internship) within their major. They use a block scheduling model that requires students to take MEDDIET 4923, 4924, & 4925 concurrently. Their lab course (MED DIET 4925) is 5 clock hours, one day a week to accommodate the block scheduling. Our program is much more flexible in terms of class scheduling and we do not admit students as “a class” or put them into a lock-step scheduling sequence. A 5 clock hour lab time is not feasible for scheduling our students.

Please let me know if you need any more information.

Thanks,
Tonya

Columbus, OH 43210

Dear Dr. Larsen,

The faculty in the Human Nutrition program area in the Department of Human Sciences have created a one credit hour lab course, HUMNTR 5622, designed to be taught in conjunction with and enhance the material that is taught in the existing course, HUMNTR 5612. This course addition is a practical application of the nutrition care process through assessment, management and treatment of various disease states. Both the department and the college curriculum committees have voted in favor of this new course and to add it as a required course for the dietetics specialization. We are hoping to secure your support for this new course.

Let me know at your earliest convenience if you have questions regarding this request.

Best wishes,
Gene
